

Ali Samadi

Full-Stack Developer

EXPERIENCE

Frontend Developer

Crosspost.app

Aug 2023 - Present

- Built the entire frontend with smooth animations and a highly user-friendly interface.
- Developed multi-platform posting, a simple in-browser video editor, and efficient handling of large media/data.
- [Demos of the website](#)

Frontend Developer

EigenExplorer

Aug 2024 - Present

Multiple Projects: [EigenExplorer](#), [Area](#), [B402](#), [Blockless Network](#)

- Built and maintained multiple high-end, pixel-perfect websites with complex UI designs.
- Converted detailed design specs into clean, responsive, and performant code.
- Created reusable UI components and optimized layouts for all devices.

PROJECTS

ZuudeUI

Built a React/Next.js component library (video, cropper, iOS mockups) and a SaaS platform selling high-motion UI animations using Framer Motion.

PostStarter.dev

PostStarter.dev is a developer template (v0.5) that helps you build a real posting website using Next.js 16, tRPC, Tailwind, Better Auth, Drizzle ORM, and Neon. Post once → post to YouTube, X, Instagram, TikTok and more in the future.

NPM Insight

Built a clean dashboard that visualizes NPM package downloads and displays package details/readme with a modern UI.

Custom Animation Components & SaaS Starter Template

Built reusable, high-motion animation components for client projects and developed a full SaaS starter template to quickly bootstrap new products.
